

How to Use the Shaker Insert

What You'll Need

- Romabio Shaker Insert
- 1L or 2.5L Romabio paint pail
- Rubber mallet (recommended)
- Paint shaker or mixer

Before You Start

- Make sure the lid is on tightly before shaking
- Confirm your shaker/mixer fits a 5-gallon setup
- Always align the pail correctly to avoid damage

Place the Pail In the Insert

1. Remove the lid from the paint pail
2. Take out the black foam pad and set it aside
3. Place the pail into the shaker insert. For the 2.5 L, remove the smaller 1 L insert. If using with the 2.5L Pail, align the pail ears with the slots (2.5 L) and make sure the handle folds into the cutout
4. Put the foam pad back on top
5. Reattach the lid and lightly tap with a rubber mallet to seal
6. Place the assembled unit into the shaker

After Mixing

1. Remove the pail from the adapter
2. Reinsert the inner foam insert (for future 1L use)
3. Store all parts together

Quick Tips

- Always double-check alignment before shaking
- Keep foam pieces clean and intact
- Store all components together to avoid losing parts
- Inspect the adapter regularly for wear
